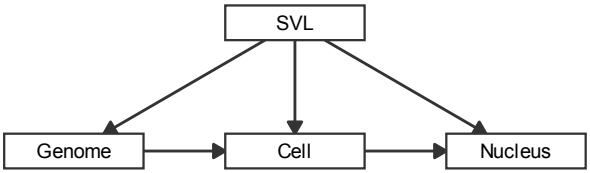
b

Candidate structures

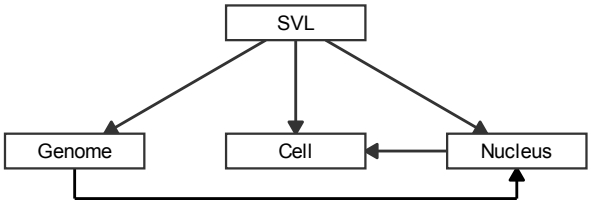
H1 SVL upstream: cell bridge

10 equivalent orientations



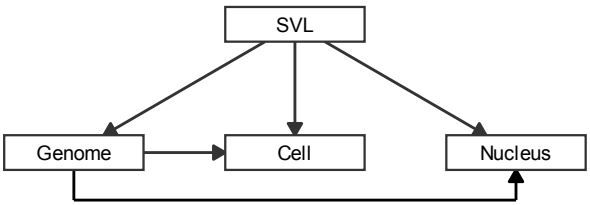
H2 SVL upstream: nucleus bridge

10 equivalent orientations



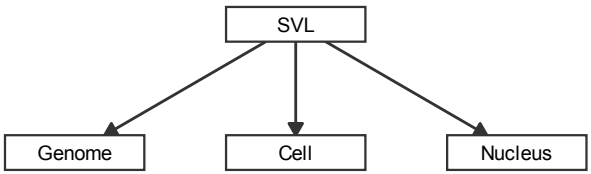
H3 SVL upstream: genome fork

10 equivalent orientations



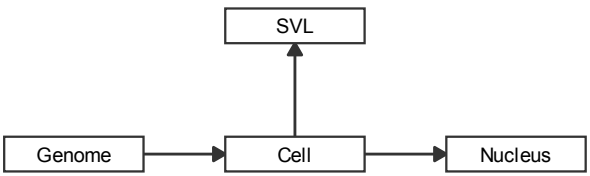
H4 SVL-only fork

4 equivalent orientations



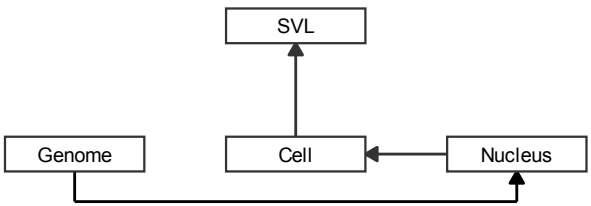
H5 Cell linked to SVL

4 equivalent orientations



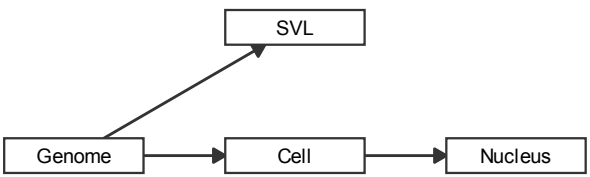
H6 Nucleus–cell–SVL chain

4 equivalent orientations



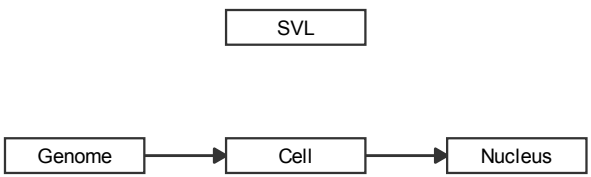
H7 Genome linked to SVL

4 equivalent orientations



H8 SVL independent

3 equivalent orientations



SVL = maximum snout–vent length. Each displayed direction is a representative hypothesis.
