b
Uncertainty in the three displayed paths
β [95% interval]
Genome → cell
0.72 [0.43, 1.01]
Cell → nucleus
(adjusted for genome size)
0.57 [0.07, 1.07]
Genome → nucleus
(adjusted for cell area)
0.008 [-0.49, 0.51]
-0.5
0.0
0.5
1.0
Standardized coefficient, β
Nucleus area is regressed on genome size and cell area together.
Intervals are normal approximations (estimate ± 1.96 SE).
