

Biologically retained three-trait DAG gallery

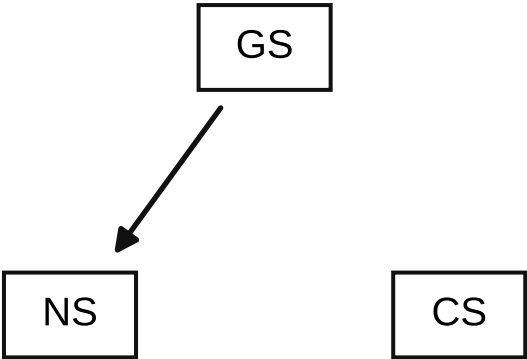

Genome-cell-only is excluded as biologically implausible here; the saturated class is excluded because it is untestable. Both focal nucleus-bridge chain orientations are shown.

Independent

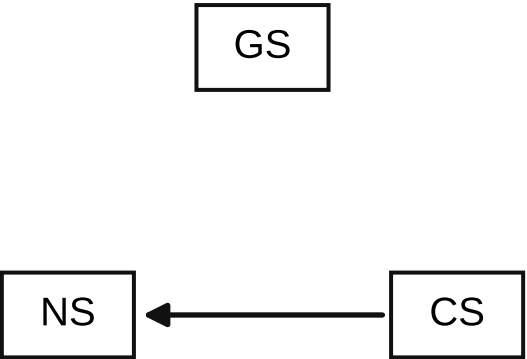

GS independent of NS; GS independent of CS; NS independent of CS

Genome–nucleus only

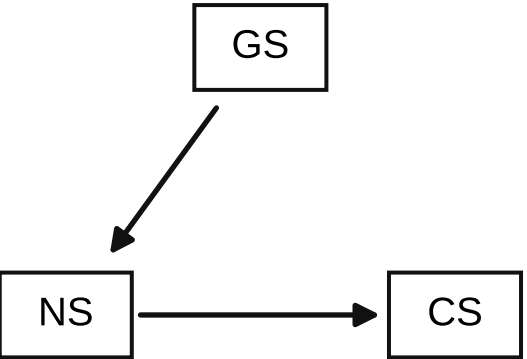

CS independent of GS; CS independent of NS

Nucleus–cell only

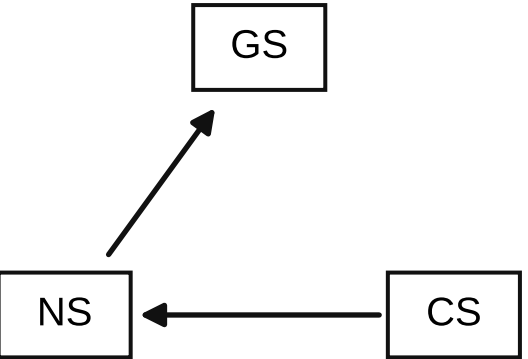

GS independent of NS; GS independent of CS

Nucleus bridge

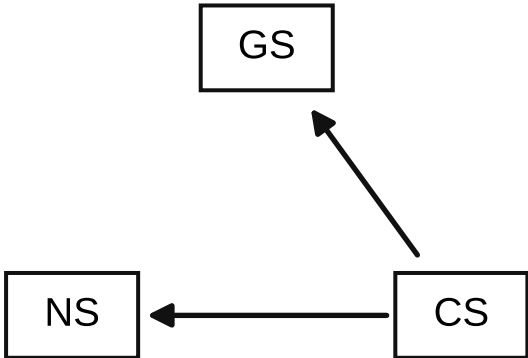

GS independent of CS | NS

Cell → nucleus → genome

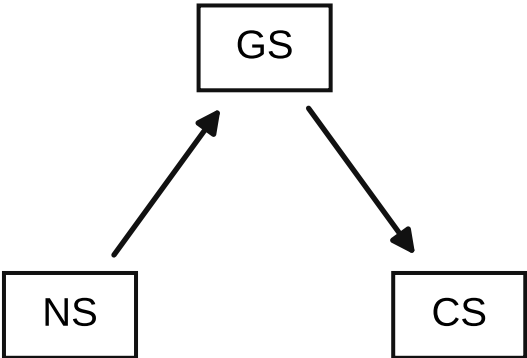

GS independent of CS | NS

Cell bridge

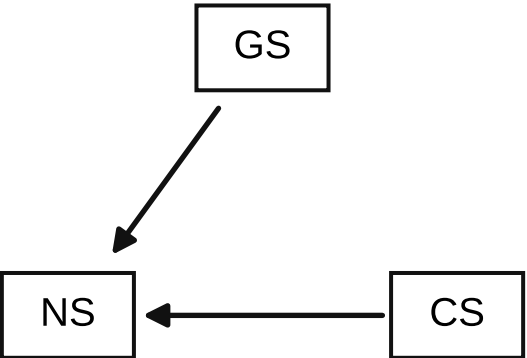

GS independent of NS | CS

Genome bridge

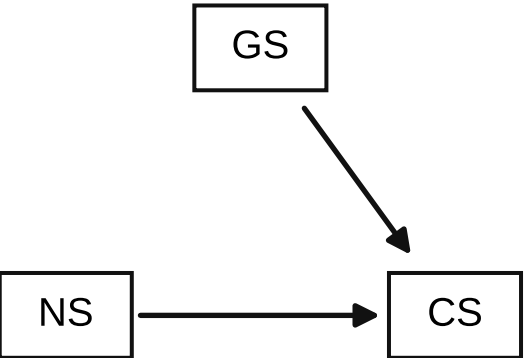

NS independent of CS | GS

Nucleus collider

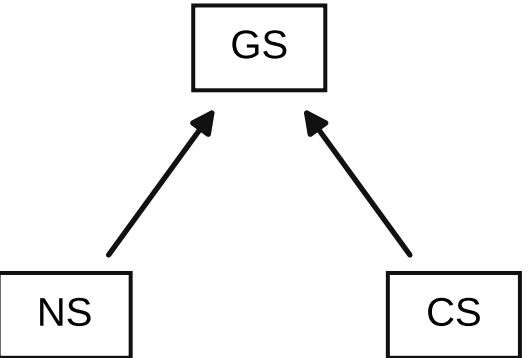

GS independent of CS

Cell collider

GS independent of NS

Genome collider
